Emil Aguirre Herrera

IT Support & Networking · CompTIA Network+ · Microsoft Azure Fundamentals
Austin, AR · (501) 628-7660 · emilagui01@gmail.com · linkedin.com/in/emilagui01 · github.com/emilagui01

SUMMARY

Computer Science graduate with CompTIA Network+ and Microsoft Azure Fundamentals, building toward a career in network engineering. Hands-on Windows Server, Active Directory, PowerShell, and Linux help desk administration from three documented labs, plus nine years as the go-to troubleshooter for a restaurant's networked point-of-sale system, including leading its migration from Aloha to Toast. Strong customer service skills from handling upset guests daily: staying calm, listening, and working the problem until it's resolved. Seeking an entry-level IT support or network support role.

CERTIFICATIONS

- **CompTIA Network+** — Aug 2026
- **Microsoft Certified: Azure Fundamentals** (AZ-900) — Sept 2026
- **CompTIA Security+** (in progress) — Target Dec 2026

TECHNICAL SKILLS

- **Networking:** TCP/IP, subnetting, VLANs, routers and switches, DNS, DHCP, Wi-Fi troubleshooting, VPN fundamentals
- **Systems Administration:** Active Directory (users, groups, OUs), Group Policy, file shares and NTFS permissions, Hyper-V, PowerShell (AD cmdlets, automation testing), Apache, MariaDB, LDAP, SSH
- **Support:** Ticketing (osTicket), SLA tracking, Tier 1 to Tier 2 escalation, knowledge base articles, account lockouts and password resets, hardware and POS troubleshooting, system migration and end-user training
- **Operating Systems & Cloud:** Windows 10/11, Windows Server 2022, Linux (Ubuntu Server), Microsoft Azure and Entra ID
- **Programming & Web:** Python, Java, C++, JavaScript, SQL, HTML/CSS, Angular, Node.js, Express, MongoDB, Git

TECHNICAL PROJECTS

Windows Server 2022 Active Directory Home Lab · emilagui01.github.io/ad-homelab
- Built a Hyper-V Windows domain (AD DS, DNS, DHCP, OUs, security groups, domain-joined Windows 11 client) with Group Policy for drive mapping, Control Panel restrictions, and Remote Desktop access by group.
- Resolved account lockouts (traced to the source device with event ID 4740), password resets, disabled accounts, and policies not applying (gpresult).

Help Desk Ticketing System Lab · emilagui01.github.io/helpdesk-lab
- Deployed osTicket on Ubuntu Server 24.04 (Apache, MariaDB, PHP) administered over SSH, and connected it to Active Directory over LDAP with a least-privilege service account.
- Configured SLA tiers, Tier 1 and Tier 2 departments, auto-routing help topics, and role-based agent access; worked tickets through escalation and wrote knowledge base articles.

PowerShell Automation Lab · emilagui01.github.io/powershell-automation-lab
- Deployed and tested three AI-generated PowerShell scripts for the AD account lifecycle: CSV bulk onboarding (OUs, groups, home folders), offboarding that disables and archives instead of deleting, and an HTML health report.
- Previewed every change with -WhatIf and tested with bad data, catching a duplicate-account bug before the live run; onboarded 15 users in about 4 seconds, with requests worked from osTicket tickets.

CS-499 Capstone ePortfolio · SNHU · emilagui01.github.io/capstone
- Enhanced a MEAN-stack travel app (JWT auth, validation) and a C++ course planner (hash table lookup).

PROFESSIONAL EXPERIENCE

Manager / Server · Jose's Compadre Mexican Grill, North Little Rock, AR · July 2017 to Present
Split role: run shifts as manager or work the floor as a server, depending on the day.
- Serve as the restaurant's in-house POS administrator: led the May 2025 switch from Aloha to Toast and taught all staff the new system for a smooth transition. Now manage employee accounts, role permissions, and menu configuration, and troubleshoot terminals, receipt printers, card readers, and network connectivity on site. This cuts downtime during service, and the restaurant hasn't needed to call Toast support in over six months.
- Trained and onboarded 13 new employees on service standards, daily procedures, and the POS system; most became some of the strongest staff the restaurant has had, leading to happier guests and a better dining experience.
- Supervise 5 to 8 employees on managed shifts, coordinating the floor and kitchen so tables aren't left waiting and orders come out correct and in order.
- Build rapport with regulars and first-time guests through friendly, attentive service. When guests are upset, stay calm, listen, and work the issue through to a resolution, the same approach that works with frustrated end users.

EDUCATION

B.S. Computer Science · Southern New Hampshire University · June 2026 · GPA 3.94 · President's List · Honor Roll (12 terms)
A.S. Liberal Arts and Sciences · Arkansas State University-Beebe · May 2022
